D8T

67800 HB-D8T KIT

BASED ON AN IFMAR WORLD CHAMPION

Building on the tremendous success and the strong foundation of the D8, we created the D8T! If winning races is why you race, then this is the truggy for you. Designed with optimal weight distribution and a low center of gravity in mind we have put together a super stable and easy to drive truck that will get you to the winners circle without breaking your piggy bank. Start throwing down some consistently fast lap times with a D8T of your own!

ONE PIECE RADIO TRAY

- The one piece tray allows for easy maintenance as it can be removed in one section when you need to clean the dirt off your ride.

CAPTURED HINGE PINS

- Forget about pesky E-clips, the suspension system on the D8T was designed using button head screws to secure all hinge pins for the ultimate in ease of maintenance and reliability.

COLOSSAL 16MM BIG BORE SHOCKS

- The Super-sized shock package is the largest in its class allowing the D8T to recover from the roughest of landings.

2008 IFMAR WORLD CHAMPION

ATSUSHI HARA

HB CERTIFIED BODY

4.3:1 INTERNAL GEAR RATIO

5X10MM CLUTCH BEARINGS

NEW SUSPENSION AND CHASSIS DESIGN

- Optimized Suspension Geometry to attack the rigors of the new age 1/8th scale tracks.
- Centralized Weight Distribution provides superb balance with increased transitional agility.

ONE PIECE ENGINE MOUNT

- The one piece design allows you to set the gear mesh once and not worry about adjustments during maintenance.

LOW PROFILE AIR FILTER

- The new slammed look of the filter not only looks pro, but provides a larger surface area for your engine to breath through.

NEW 150CC FUEL TANK WITH PROVEN HPI BAJA 5B CLUNK DESIGN

- Utilizing 1/5th scale technology the D8T implements a new clunk design which will use every drop of fuel whether you're racing to the line, or upside down waiting for a marshal.

4MM CHASSIS

- The staunch 4mm 7075 Aluminum chassis is designed to withstand any barrage of obstacles on today's mammoth outdoor tracks.

JUMBO SIZED WHEELS

- Grab a larger piece of turf with the D8T's Maxed out wheel dimensions.
- The largest wheels allowed under ROAR rules, these puppies will put more of your tread on the ground so you can put more of your rivals behind you.

DIMENSIONS:

CHASSIS LENGTH: 530MM

(from bumper to rear wing end) no tires

WIDTH: 405MM

WHEELBASE: 380.5MM-383.5MM
