## 4.6 Big Block

- ✓ MORE TORQUE
- ✓ MORE SPEED
- ✓ RUNS COOLER

RTR SAVAGE X 4.6

## BIG BLOCK MONSTER POWER!

The RTR Savage X 4.6 is our fastest and strongest ready-to-run Savage... EVER! That's right, we've raised the bar by adding a massive F4.6 engine and beefed up the chassis and drivetrain to handle the power. The F4.6 engine is so fast, in fact, that HPI designers made significant improvements to the chassis, gear cases and other parts of the truck so it could handle the extra power! The F4.6 engine pumps out nearly 3 horsepower and sits on an improved engine mount and thicker engine plate to give you more durability and endurance, especially when you're landing massive jumps! A huge list of performance and durability upgrades come standard in the RTR Savage X 4.6, so you know that you've got a truck that can handle extreme off-road driving.

2-Speed transmission for fast acceleration and insane top end speed.

Eight long-stroke oil-filled shocks absorb the impact of rugged offroad driving.

Chrome Warlock wheels with tough 17mm hex hubs.

The Alloy Diff Cases prevent damage to the internal diff gears, even with the power of a Big Block engine.

#867 - Savage X 4.6 RTR  
Two body color schemes to choose from!
