6061 T6 monocoque chassis

**CLASSIC STYLE**

Baja style roll cage made of high impact nylon gives the classic look and protects the engine and body from crash damage.

BAJA 5B SS

## RAW POWER!

Kit builders... the Baja 5B SS comes as an unassembled kit with a complete instruction manual for the build-up, and it has a huge list of hop-up parts you won't find on the RTR version. For sand scorching power, a larger 26cc engine is mated to an aluminum tuned pipe and high RPM clutch. To handle the power we added a tough aluminum diff case, re-designed VVC/HD shocks with larger diameter shafts, all-metal dogbones, and heavy-duty beadlocks. And it looks great too, with a new gunmetal anodized chassis, orange anodized trim, and a clear pre-cut body so you can add your own custom paint job. We include a high output metal geared servo in the box, you supply your own transmitter, receiver and receiver battery pack. Enjoy the process, build your own high performance Baja 5B SS!

**FUELIE 26S 26CC ENGINE**

More power, more torque and more speed than 23cc engines.

**8000 RPM CLUTCH**

Launches the Baja 5B at higher RPM for more punch off the line.

**ALUMINUM TUNED PIPE**

Tuned for increased power and quicker acceleration. The kit also includes an optional can muffler for quieter operation.

HPI RACING'S BAJA 5B GOES  
120 MILES THROUGH THE DESERT.
