MICRO R/C ACTION!

The Micro RS4 took the 1/18 scale R/C market by storm, winning the prestigious RC Car Action "Car of the Year" award for its combination of innovative design and "fun factor" driving characteristics that allow it to be run in small areas. The Sport and Drift versions include updates that improve performance and a new price that makes it even more affordable. The Micro RS4 is the R/C car for everyone! With features normally found only on larger scale R/C cars, the Micro RS4 is a great mix of fun and performance. Tuning options and hop-up parts will satisfy the racer, while the scale looks and ease of driving will satisfy the scale enthusiast. The Micro RS4 is the fast, exciting and affordable way to have fun with R/C!
