RTR
"READY-TO-RUN"

FIREBOLT
SCREAMING FAST
15T FIREBOLT MOTOR
Reliable, high performance motor for out of the box, screaming fast speed.

E FIRESTORM 10T

ELECTRIC 2WD STADIUM TRUCK!

The HPI E-Firestorm is a 2WD 1/10th scale stadium truck that, in the fiercely competitive 2WD truck class, separates itself from the competition with extra toughness and a long list of race-inspired features... all at a price that beats the competition. From the tough ALL METAL gear transmission to full adjustability of the suspension geometry, the E-Firestorm sets a new standard for ready-to-run stadium trucks. Full ball bearings, fast 15 turn motor, reversible ESC, silicone oil filled threaded shocks – it's all there, precision built from the factory. Top it off with your choice of a bright red or metallic silver custom screened DSX-2 body and your E-Firestorm is ready to hit the dirt!

» **THREADED SHOCK BODIES**
Allows fine adjustment of ride height.

» **SILICONE OIL-FILLED SHOCKS**
Highest performance and more consistent action in extreme temperatures.

» **SC-15 SPORT CONTROL ESC WITH REVERSE**
Reliable ESC with smooth throttle response and an on/off switch.

» **DURABLE LOW-PROFILE 2.61 RATIO ALL METAL GEAR TRANNY**
Extremely durable and capable of handling very powerful motors.
