

E10™ TOURING E10™ DRIFT

E10 TOURING/DRIFT

VALUE PRICED READY-TO-RUN ELECTRIC!

The motor and radio equipment can be moved to optimize the weight balance for smooth drifting or high grip cornering.

An enclosed drivetrain keeps dirt and dust out of the gears for low maintenance and reliability.

ADJUSTABILITY

It's easy to change the weight distribution between drift and touring layouts for optimal handling!

PRE-BUILT KIT. DIMENSIONS: LENGTH: 17" (431mm), HEIGHT: 5" (127mm), WIDTH: 7.5" (190mm)

The E10 Touring and E10 Drift are entry level 1/10th scale electric cars designed for fun driving with realistic looks and performance, all at a low price. The E10 was designed so anyone can take the wheel and give it a go! A full-time 4WD transmission and independent suspension make it easy to drive on paved parking lot surfaces. The E10 uses standard body mounting points so owners can fit a wide variety of HPI Racing bodies to customize the look of their car and most popular wheel and tires bolt right on for extra tuning and styling options. It's super-easy to choose from an extensive range of touring car, muscle car and drift car accessories to customize the E10. All versions come with a Saturn 27T electric motor for reliable power and performance!
