ENGINE

High-power G3.0 engine with dual-stage foam air filter and race-style carburetor for maximum performance

RTR NITRO 3 DRIFT

NITRO POWERED DRIFT!

The HPI RTR Nitro RS4 3 Drift comes preassembled with a painted and decaled body, ready to go right out of the box! It features a revised chassis design that moves the engine forward and specially tuned drift springs to make drifting easy. Type A drift radial tires are made from a special hard compound rubber for high speed nitro drifting. The 1.5 hp G3.0 engine is easy to tune and supplies massive torque for smooth, fast drifting. For custom looks, the Nitro 3 Drift includes Volk TE37 deep dish chrome wheels and your choice of either the Toyota Soarer or Nissan Silvia for authentic JDM drift style! Start nitro drifting today!

» REAR EXIT EXHAUST
Helps keep the chassis clean and looks realistic.

» SINGLE SPEED TRANSMISSION
Provides better throttle control for drifting.

» TYPE A DRIFT RADIALS
Hard compound rubber for high speed nitro drifting.
