RTR CRAWLER KING

## GET CRAWLING FAST AND EASY!

HPI makes getting right into crawling simple and fun with the excellent Crawler King ready to run truck kit! With its tall Rock Grabber tyres, heavy beadlock wheels, super-narrow chassis, front-mounted battery and motor, full-time 4WD and locked gearboxes, you will be king of the mountain! Crawling allows you to attempt the impossible by attacking near-vertical cliffs, slick rock faces and piles of mountain rubble! Although in competitions the truck owners compete against each other, the magic appeal of rock crawling is that each driver competes against their own abilities, trusting in the strength of their equipment and the machine that is bringing them up the hill.
