NO BATTERIES, NO CHARGER  
**E-SAVAGE SPORT**

#517 E-Savage Sport  
with GT Truck body

The E-Savage Sport has all of the features in the standard E-Savage, but we've deleted the battery packs and charger to reduce the cost for RC enthusiasts who already have their own packs and charger.

RTR E-SAVAGE

## 14.4 VOLTS OF ELECTRIC POWER!

The E-Savage is the newest way to experience the fun and excitement of our "Proven Tough" Savage Monster Trucks. From entry level beginners to frequent racers, this is an excellent choice for all off-road enthusiasts. The chassis design was inspired by the time tested durability of our Savage line. Additionally, the balanced symmetrical layout, AWD drivetrain and awesome power of twin 14.4V GT550 electric motors give the E-Savage excellent performance on or off road. A completed chassis, radio set and printed and trimmed body are all included in the E-Savage RTR. It also comes with drive batteries and a high performance quick charger capable of charging two battery packs simultaneously. The E-Savage RTR contains everything you need for quick and easy electric monster truck performance.

>> Sport version of the E-Savage!

The E-Savage Sport has all of the features as the standard E-Savage, but we've deleted the battery packs and charger to reduce the cost of the truck. This version is for RC enthusiasts who already have their own packs and charger, or for the savvy customer who'd rather purchase better performing equipment than what's included with the standard E-Savage.

8 oil-filled long-stroke shocks for massive suspension travel!

Two high-power 550-size motors developed exclusively for the E-Savage.

Aluminum TVP (twin vertical plate) chassis provides a stable and durable platform.

Chrome AR-5 wheels with pre-mounted all-terrain tires.
